Input Gender

Link towards TFS: User Story 60770.

As a Payroll User, I can input the gender of a person / worker.

Goal of user story

I want to be able to select the gender, if it can't be calculated using the INSS.

In most of the times, this can be determined by the information of the INSS. When it is determined automatically, the dropdown is not editable.
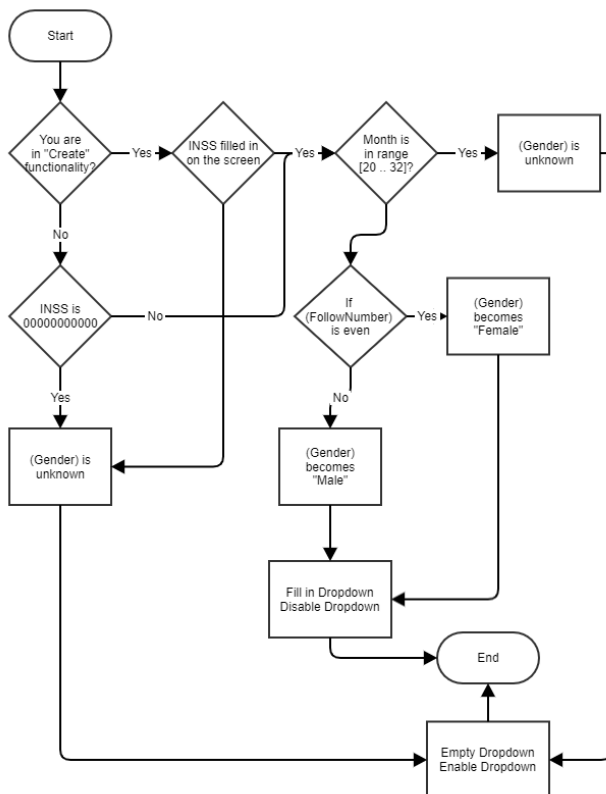

Used definitions and Three Letter Words

Link towards overview: (Glossary)

- INSS.
- Person.
- Worker.

Precedents - Start Conditions, Cause and User Stories that call this functionality

- Default behaviour: Dropdown component (Link) (TFS User Story xxx).
- Component is part of: Wizard Add Business Leader (3 Steps) (Link) (User Story 61734, User Story 51310 and User Story 58849).
- Component is part of: Wizard Add Employee (4 Steps) (Link) (User Story 51303 and User Story 51310).
- Component is part of: Update Identity (Link) (TFS User Story xxx).
- Changed behavior by: Input INSS and Validator (Link) (User Story 58500).

Scenarios (Flow)

Scenarios (Textual)

Format: ##.##.##-###.##
(Year).(Month).(Day)-(FollowNumber).(CheckDigits)

- You are in Add Employee:
    - INSS is filled in, on the screen.
- You are reading information from PayForce:
    - An unknown INSS has the value "00000000000".

- INSS is filled in / known:
    - If (Month) is >= 20 and <= 32, Gender is unknown.
    - If Not, Gender can be calculated:
        - If (FollowNumber) is even, Gender is "Female".
        - If (FollowNumber) is odd, Gender is "Male".
- INSS is not filled in / unknown:
    - Gender is unknown.

- Gender is known ("Female" or "Male"):
    - Dropdown is filled in.
    - Dropdown is disabled.
- Gender is unknown:
    - Dropdown is empty.
    - Dropdown is enabled.

Some examples

- 93.05.18-223.61 Male.
- 63.07.25-446.79 Female.
- 00.00.00-000.00 Unknown.
- 02.24.20-789.82 Unknown.

Dependents - Effects and User Stories that are based on this functionality

- Will change behaviour of: Employee Photograph or Initials (Link) (User Story 73006).

Reference data

Reference data can be found at: (Link to reference data) (Later on, this will be moved to Business Function 'Reference Data').
